

## for Cotton on Beds...

**New!**

Maximum tillage in ONE PASS! Bigham Brothers introduces our **new One Pass TerraTill® for cotton on beds**. Save time, fuel and money while preparing your bedded crops for peak production. **One Pass TerraTill®** will cut through heavy residue, till the row, undercut the stalks, press them into the row and bed up over the stalks in one pass. Single pass post-harvest tillage and bedding that leaves your land in perfect condition for the Fall, Winter and Spring. **Get your single step field advantage with Bigham Brothers One Pass TerraTill®.**

**Also effective for corn, sorghum, soybeans and other bedded crops.**

# One Pass TerraTill - Machine Features

## Rear Bedding Tools:

- Exclusive Bigham Hi-Wing Buster will throw peaked beds over stalks.
- No-Twist foot will keep the buster stable on the shank.
- Precision cast ductile iron clamp is designed to break a bolt on impact.
- Bedding shank is heat treated for strength.

## TerraTill® Angled Leg Tillage Advantage:

- Exclusive Angled Leg design is the cornerstone for **true one pass tillage**.
- Three high quality replaceable wear parts protect each Leg.

## Front Coulter:

- Spring Loaded Swivel Coulter has 1200 Lbs. of residue slicing pressure
- 20" Fluted Blade is mounted to heavy narrow profile hub.

## Rear Pressing Roller:

- Smooth roller is 12-3/4" Diameter and turned in a lathe for a true circular shape. Scrapers are included with roller package.
- Exclusive telescoping mount jack provides easy height adjustment for each row.
- Rubber torsion spring protects jack and roller but maintains maximum pressure to lay the stalk row down.

## Stalk Hood Guide

- Guides the stalk row to the rear pressing roller.

## Performance Features:

- Optimized tool spacing. Maximum trash and soil flow between tillage components is based on years of field testing and experience.
- All units are height adjustable in relation to tillage depth.

## 1 Pass TerraTill for Cotton on Beds is very effective in Corn on beds.

- Tested extensively in high yield corn as well as high production picker cotton.
